Hospital Security

- *Trained IAHSS security officers that understand the unique needs of a hospital.*
- *Technology to support the security teams mission*
- *Proven past performance*
- *Expert project management*

Point 2 Point Global Security, Inc. is an industry leading provider of quality, customer focused security services in the United States. We provide our security services to clients that lead their industries on a local, regional and national level; protecting critical assets and infrastructure for commercial, industrial and governmental organizations.

Our expertise includes armed and unarmed uniformed security, off duty police, physical security, asset protection, special projects, executive protection, special event protection and security escorts on a permanent and emergency basis. Our highly trained security staff consists of off duty and retired police officers, government agency and ex-military professionals that allow us to provide first class service.

People, property, information and reputation – must be protected with good security in a hospital environment. P2P is proud to be a member of the International Association for Hospital Security and Safety whose training emphasizes these areas. Our team consist of certified IAHSS trainers that guarantee that our security officers have the most up to date –hospital focused–training in the industry.

The main threats in today's hospital environment are insider/employee theft, outsider gang members, visitor thefts, threats against patients or staff, and crimes of opportunity. Our team is trained to deal with these issues.
